MEMORANDUM FOR THE RECORD

SUBJECT: Developments re PHS production Sections 45

25X1A9a

25X1A9a 1. For follow-up of 2 Sept discussion, I today inquired of [REDACTED] 25X1A9a  
at OSI if [REDACTED] had perhaps now been on duty long enough to permit an  
informal Harriet Lane conference with [REDACTED] and others. [REDACTED] 25X1A9a  
25X1A9a said he was much in favor of such a meeting, but that an OSI session with  
[REDACTED] on other matters as well as Section 45 is being held up by [REDACTED] 25X1A9a  
absence on a WHO mission. He thought they would have such a meeting in  
early November, and that early December would be a good target for the  
specific Section 45 session at Harriet Lane.

25X1A9a

25X1A9a 2. [REDACTED] said existing PHS interest in Section 45 has been heightened  
by a bill (SJR199) introduced at the fag end of the last Congress by Lister Hill  
to expand the NIH divisions from 7 to 8 to include a new Institute for Inter-  
national Medical Research. This was tentatively budgeted for some  
25X1A9a [REDACTED] and, while primarily concerned with grants and  
general interest in foreign medical research, in [REDACTED] view would 25X1A9a  
in effect push NIH/PHS into the general area of evaluation which is  
involved in producing Sections 45. Some jurisdictional gimmicks with  
25X1A9a ICA would be likely, but [REDACTED] feels that Hill, referred to as "the  
daddy on the Hill for medicine," probably would get this bill through  
at the next Congress.
